PROFESSIONAL EXPERIENCE

MERN Stack Intern 10/2025 – 04/2026

Velocis ⚡

- Developed and streamlined a full-stack project management platform using **React, Node.js, Express, and MongoDB**, building reusable components, REST APIs, and core backend features.
- Implemented **JWT authentication, role-based access control, Redis caching, database indexing, and API performance optimizations**, improving response time and scalability.
- Contributed to production-grade engineering practices using **Swagger, Winston logging, error handling, input validation, and security middleware** in a scalable MVC architecture.

Backend Developer 08/2025 – 10/2025

ErrorBite ⚡

- **Enhanced backend features** for a MERN stack web application, supporting **100+ user interactions** and improving **data management efficiency**.
- **Built 8+ RESTful APIs** using **Node.js** and **Express.js**, and reduced query latency in **MongoDB**, reducing **API response time by ~20%**.
- **Integrated APIs with frontend built in React**, enabling **seamless data flow and scalable application performance**.

PROJECTS

PROJECT MANAGEMENT TOOLS ⚡ 03/2026

Scalable Project Management Platform

- Built and deployed a scalable **Project Management Platform** using **React 18, Node.js, Express, MongoDB**, implementing **JWT authentication, RBAC and Redis caching**, delivering an enterprise-ready full-stack solution.
- Streamlined backend performance by **60%** through **Redis caching, and MongoDB indexing** while improving scalability with **MVC architecture**, and **reusable API design documented with Swagger**.
- Strengthened security and production reliability using **bcryptjs and input validation**, achieving **zero known vulnerabilities** with 100% feature-complete production-grade code.

RydeUP ⚡ 01/2026

Real-Time Sync Between You and Rider

- **Built** a full-stack MERN application integrating **TomTom Maps API** for precise **real-time location tracking, dynamic route visualization, geolocation services, and optimized navigation workflows**.
- Architected a **Socket.io** for instant ride status updates and seamless captain–user synchronization, improving real-time communication and user experience.
- Delivered a scalable **real-time ride-booking** platform with live tracking, event-driven updates, and responsive UI.

Imagify ⚡ 10/2025

AI-Powered SaaS for Instant Image Creation

- **Developed** an AI-powered SaaS platform for **text-to-image generation** using **MERN** and **ClipDrop API**.
- **Implemented** secure **JWT authentication**, real-time **credit tracking**, and integrated **Razorpay payment gateway** for seamless credit purchases and user access management.
- Launched a scalable **monetized platform** with automated image generation workflow, secure transactions, and improved user engagement through a responsive **Tailwind CSS** UI.

SKILLS

Language	Frontend	Tools & Tech	APIs & SDKs
Java C++ JavaScript (ES6+)	React.js, HTML5, CSS3, Tailwind CSS, Framer Motion	Git, GitHub, VS Code, Postman, Vercel, Redis, Render, Swagger	Razorpay, ClipDrop, TomTom map, OpenAI, JWT, Claude
Backend	Database		
Node.js, Express.js, RESTful APIs, Web Socket	MySQL, MongoDB		

EDUCATION

KCC Institute of Technology & Management 2022 – 2026 | Gr.Noida

B.Tech in Computer Science & Engineering

7.8 CGPA

CERTIFICATES

Java Web Development with AI-Trainee, HCLTech — Completed **110+ ILT** and **110+ SDL hours** in **Java, Web Development, and AI**. | **Built and debugged industry relevant projects** using **software testing principles** to improve **quality and reliability**.

Backend Development Course — PW Skills: JavaScript, Node.js, Express.js, MongoDB, HTML, CSS, React
